Size: height 235 mm x width 65 mm x depth 40 mm.

Material: polypropylene.

Color: transparent.

Colour: As in the picture

TECHNICAL DATA SHEET

5. HOW TO USE:

Place GEO PAD COMBO MORTALIN:

- In civil and industrial environment where foodstuffs are stocked and (or) clothes or drapery is present (cotton, silk, wool or furs).

Suggested monitoring period: all the yearlong, because in a conditioned area, insects are dynamic, even if they are subjected to seasons.

Monitoring frequency: Ideally, traps should be inspected on a weekly basis in the summer and fortnightly in the winter.

Change the trap after two months (at the latest) or before according to the pest infestation or the presence of dust, water and/or damp in the environment.

Storage conditions: in a cool and dry room, temperature below 25°C and R.H. below 55%.

Shelf life of the products: If well stored (intact packaging), the product shelf life is 3 years.

Batch number explanation (outer carton batch number): Reads as DDDYY (i.e. DDD = progressive day of the year, YY = two last number of the year) i.e. 14720 = 147th day of 2020 = 26th of May 2020.

Batch number explanation (individual traps batch number):

This batch number contains more information, useful to trace the exact moment of the production of the trap, the operator and the line production.

With an example of a production of 2014 the batch number could read:

1	4	1	4	3	0	6	3		
---	---	---	---	---	---	---	---	--	--

1° and 2° column: YY last two number of the production year.

3°- 4°- 5° column: DDD progressive day of the production year.

6° - 7° column: numbers associated to the line operator.

8° column: number associated to the production line.

The example corresponds to the 23rd of May 2014. Operator 06. Line 3.

6. PACKAGING AND SPARE PARTS:

GEO PADS COMBO MORTALIN:

- PACK: 10 pieces per pack wrapped in triple layer laminated foil PET-ALU-PE

CLOTH HANGER:

- PACK: 10 pieces in transparent polyethylene sachets.
